The Morse Silent-Running High-Speed Chain

The Morse Silent-Running Chain is in constant use at speeds up to 2000 feet per minute, running efficiently, quietly and smoothly.

It can be used where belt drives would be impossible, on account of short centers, heat, dampness and other conditions.

For many purposes it is cheaper than belting, occupies less space, is noiseless and at all times provides a positive speed ratio. Under equal conditions it will transmit without joint wear, more power per inch of width than any other chain made. *Fully Described in Catalogue 7.*

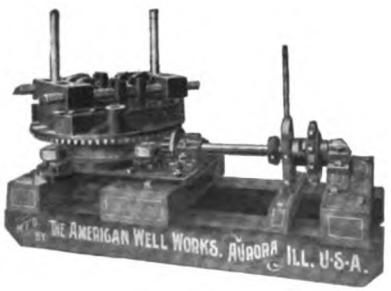
40 Years of Experience

Behind the "American" Line of Machinery

Two-fifths of a century of collaboration between engineers in the field, in nearly every part of the world, and our engineers in the office, in improving, simplifying and perfecting every detail, has developed the "American" machines to a degree of excellence that they represent the standard of their respective types.—Every possible betterment has already been made.



There's the reliability of perfected, standard machines that are dependable when you buy "American" Drilling Machines, Coring Machines, Plain Centrifugals, Sand and Dredge Centrifugals, Turbine Centrifugals, Deep Well Single and Double Acting Cylinder Pumps, Air Lift Pumps, Air Compressors and Gasolene Engines.

Why Marsh Mixers are Best

The officers of this company are the same who sold 3,000 mixers.

In doing this we met more than 10,000 buyers.

The experienced advice of these practical men — contractors, engineers and architects — gave us a world of information to base a new mixer upon.

That's how we were able to avoid all the faults and keep all the good points and incorporate new improvements which you, if one of our former customers, may have suggested.

These are some of the reasons why you should see us before buying a concrete mixer. *Write for Catalog.*

GRAVITY CARRIERS FOR ALL PURPOSES

THE GRAVITY METHOD of handling boxes, barrels, brick, lumber,—in fact, almost anything—saves handling, trucking, etc., thus increasing speed in production while greatly reducing labor expense. We make gravity carriers for conveying articles from one point in a building to another,—from shipping or packing rooms to cars, or from cars to any floor or point in building—entirely by gravity, using only a four per cent grade. Carriers are ball bearing and rigidly constructed, also AUTOMATIC straight lift and inclinable elevators to use in conjunction with the carriers. Write the Engineering department for information, advice and estimates, stating your particular requirements.

USE IT A MONTH!

Portable Crane and Hoist

Then if You'd Rather Keep the Money Than the Crane, Return It

We will send this Crane and Hoist to any responsible concern on thirty days' trial, because we know they can't afford to do without it, and that when they try it beside any crane in the market they will have no doubt as to which one they want. A stronger, heavier construction, and the use of **steel loading chain** in place of the ordinary kind, make this superior in capacity, reliability and endurance. In handling and moving heavy machine parts, it gives one man greater power than a dozen have without it.

We also manufacture Alligator Shears, Turntables. Grey Iron Castings. Builders' and Machinery Castings a Specialty.
